

*Unmetered Connections
Standards of Service for
Electricity Distribution Companies in
England, Wales & Scotland*

March 2014

Introduction

This guide sets out the standards for unmetered services to street lighting or street furniture provided by the electricity distribution company that owns the electricity wires and cables by which electricity is supplied to your equipment. In this document the electricity distribution company is referred to as "we" and "us". This guide summarises the Electricity (Connection Standards of Performance) Regulations 2010, insofar as those regulations relate to unmetered connections.

Ofgem, the industry regulator, sets the standards. If we fail to meet these standards then you are entitled to receive a payment.

These standards apply to authorities responsible for street lighting and street furniture, referred to in this document as "you".

These standards do not apply to schemes involving more than 100 units of street lighting or other street furniture, or street lighting or street furniture schemes requiring HV works.

These standards do not apply where the Local Authority has entered into a separate bilateral agreement with the electricity distributor in respect of performance standards.

Sometimes the standards may not apply, including under exceptional circumstances, or due to events beyond our control, industrial action, actions of third parties, not being able to gain access to our equipment, or NRSWA restrictions. If any of these exemptions are invoked, we will need to demonstrate that we had taken all reasonable steps to prevent the circumstances occurring and to prevent failure.

UNMETERED CONNECTION STANDARDS

Fault Repairs

If you notify us of a fault repair affecting your unmetered equipment that needs to be carried out by us we will respond in the following timescales. If we fail to meet the standard, we will make the appropriate payment.

Service	Fault Repairs – street lighting or street furniture	
Type of Connection	Timescale	Failure Payment
Works to remove immediate danger to the public or property arising from the electricity distribution network	Attend on site within 2 hours	£50
High-priority fault repair involving traffic lights	Restore supplies within 2 calendar days	£10 per working day late
High-priority fault repair not involving traffic lights	Restore supplies within 10 working days	£10 per working day late
Multiple-unit fault repair to street lights	Restore supplies within 20 working days	£10 per working day late
Single-unit fault repair to street lights or street furniture	Restore supplies within 25 working days	£10 per working day late

Provision of Quotations for New Works

If you ask us for an individual quotation for a connection scheme outside our published standard charges, we will provide this within 25 working days from when you have given us all the information that we need and paid us any applicable fees.

If we fail we will pay you £10 for each working day we are late.

This standard does not apply if you request a quotation for a scheme that causes the total number of units of street lighting or other street furniture that you have requested quotations for in the current month to exceed 115% of the monthly average for the last calendar year.

Completing New Works

(a) Works on a New Site

Once we have received written acceptance of our quotation and you have paid the full amount quoted, and you have confirmed that any prerequisite works for which you are responsible have been completed (e.g. erecting street lighting columns), we will agree a date to complete the requested scheme. Once a date is agreed to complete the works, this may be varied by your request or agreement or as notified by us (for example due to delays in obtaining TMA permits, NRSWA restrictions or other access problems, or if severe weather causes us to postpone planned works). We will complete the works on the agreed date.

If we fail we will pay you £10 for each working day we are late completing the scheme.

This standard does not apply if you request works that cause the total number of units of street lighting or other street furniture that you have requested a connection for in the current month to exceed 115% of the monthly average for the last calendar year.

(b) Works in an Existing Adopted Highway

We will complete the requested scheme within 35 working days provided that any prerequisite works for which you are responsible have been completed (e.g. erecting street light columns). This may be varied by your request or agreement or as notified by us (for example due to delays in obtaining permits, Local Authority restrictions or other access problems, or if severe weather causes us to postpone planned works).

If we fail we will pay you £10 for each working day we are late completing the scheme.

This standard does not apply if you request works that cause the total number of units of street lighting or other street furniture that you have requested a connection for in the current month to exceed 115% of the monthly average for the last calendar year.

Notification of Payment under Guaranteed Standards

If we fail to meet any of the standards we will make your payment by cheque, by electronic transmission or as a credit to your connection invoice, within 10 working days of the working day, after the day of the failure (for emergency-response fault repairs) or within 10 working days of completing the service (for all other standards covered by this document).

If we fail to make the payment within the above timescales we will send you an additional £50.

Please note that for administrative convenience you can agree a different timescale within which to receive payments in bulk. For example you may wish to receive payments quarterly. Please contact us to agree this.

Disputes

If you have a dispute that you cannot resolve with us about whether you should receive a payment, you may refer the case to the Office of Gas and Electricity Markets (Ofgem), the independent regulator for the electricity industry, to request a formal decision.

In line with Section 39A (5) of the Electricity Act 1989 (as amended by the Utilities Act 2000), any guaranteed standard payments you receive will not prejudice your entitlement to any other remedy or action that may be open to you because of the distributor's failure.

Contacting Your Electricity Distributor

To request a service from us, please telephone us on the relevant number below. Further contact details are available on our website.

Please note if you ring or email us outside normal working hours, we will treat your request as having been received at the start of business on the next working day.

Where we have indicated willingness to accept requests for quotations by telephone, such requests are covered by the 'provision of quotations' standard referred to above.

Electricity Distribution Company Contact details

Company	Area	Emergency/ Loss of Supply (24 hour)	Unmetered Connections Enquiries (Mon-Fri unless otherwise stated)	Website address
Western Power Distribution East Midlands	East Midlands	0800 056 8090	0845 7240240 08:30 to 17:00	www.westernpower.co.uk
