

SCOTTISHPOWER PATHWAY TO COP26

ScottishPower has a pathway to COP26 when the conference comes to Glasgow in 2021. We are looking forward to working with everyone that is committed to making COP26 the success it needs to be to tackle climate change.

Leadership

We are preparing to play our part in the transition to Net Zero and building on the changes we have already made to become the UK's first integrated energy company to generate 100% green electricity.

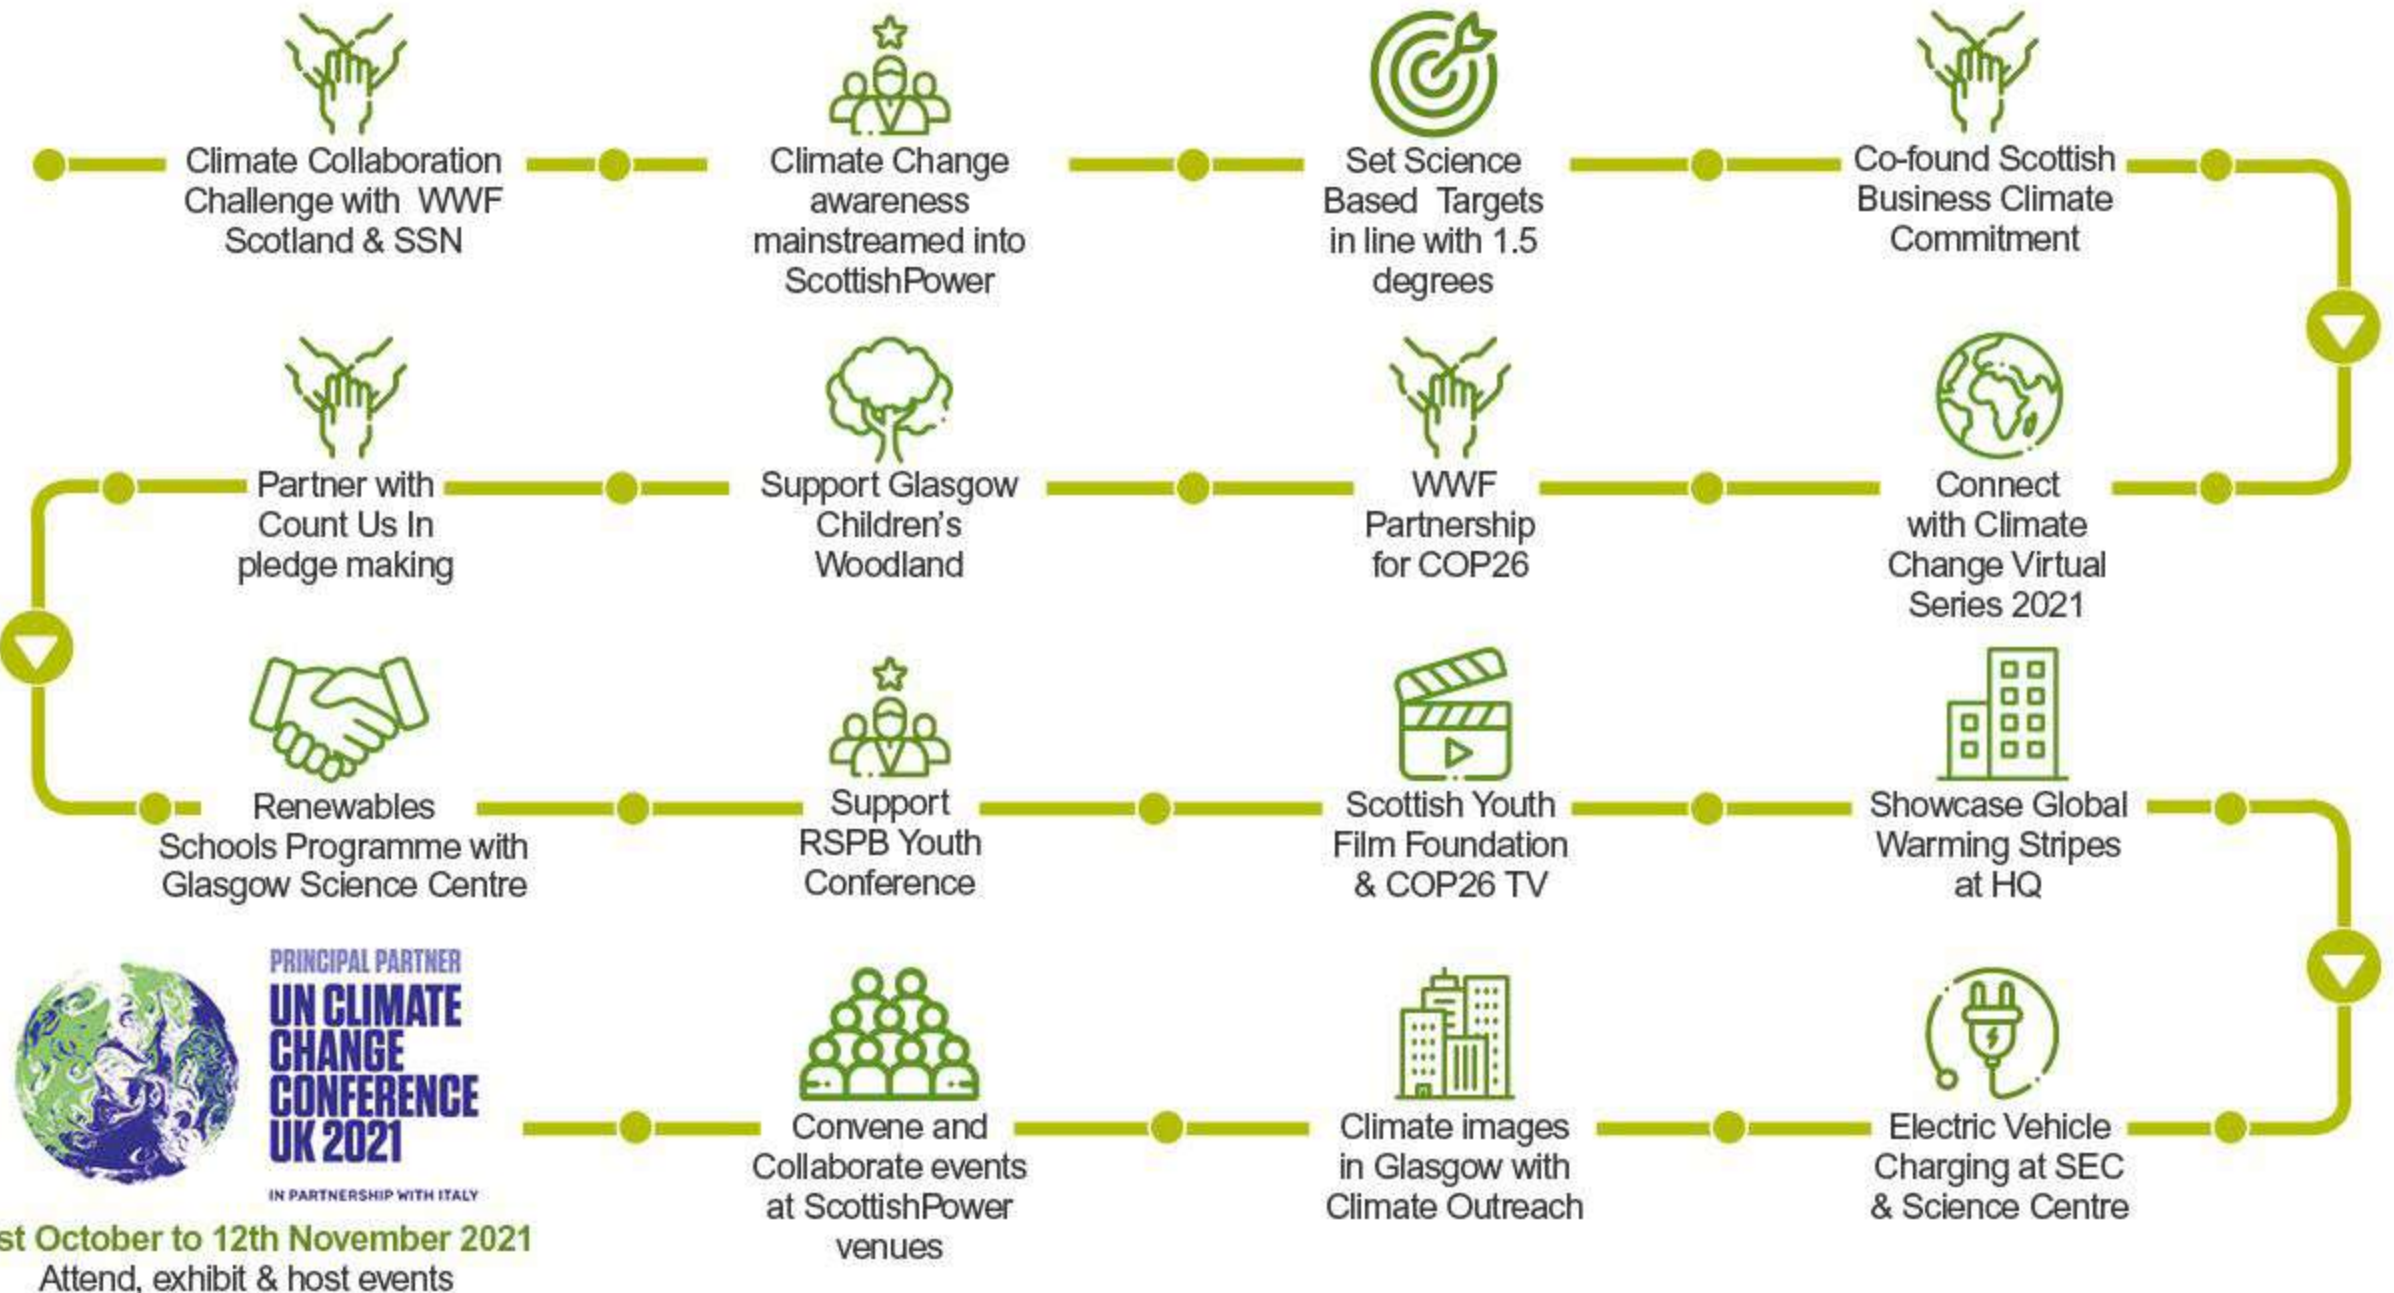

Collaboration

We are excited to welcome COP26 to Glasgow and have the opportunity to share and collaborate with a variety of partners on plans that will help us fight climate change.

Legacy

We are ready to help deliver the accelerated change that is needed to tackle climate change. We want to play our part in ensuring COP26 delivers the response we need and raising our collective ambitions.

Along with the Iberdrola Group, we are also supporting Race to Zero. With the Cabinet Office we are preparing plans to optimise the experience of delegates at COP26 with our offering of installations.
